

PLEASE COMMENT on the Proposed Shell Offshore, Inc., Air Quality Control Minor Permits.

Date: 5/8/07

The air pollution get heavy it go into the water + the current take it out into your food chain, the current on the 30m mark + 60m mark sometime goes two different way. The air pollution in the arctic and the ocean is messy plus the fog from the North with the pollution in the air goes into the water. The skin on your food chain get sick + weak to use + the food is no good to eat.
